

FIO SYSTEMS AG is a German leader in providing web-based real estate and banking solutions. Established in 1999, our company stands for high-efficient software solutions and consulting services. Our products cover all processes in the areas of real estate management and marketing, virtual banking and claim management.

We are seeking to attract a talented student for the following internship position:

.NET Intern

As a .NET intern you will be responsible for the test-driven development of our internal company management web applications. In order to get selected you should have completed at least your second year of education in Computer Science, Informatics or a related degree. Duration of the internship is from 3 to 6 months depending on the amount of work and your availability.

Scope of responsibilities:

- Implementing new features
- Fixing bugs and performance issues
- Refactoring and improving old code in terms of readability, design patterns, architecture
- Writing unit tests

We require:

- Solid knowledge of object-oriented programming
- Strong interest in ASP.NET (Web Forms or MVC) and C#
- Knowledge of Microsoft SQL Server
- Understanding of design patterns and reusable software design approaches
- Ability to work in a team
- Good troubleshooting and problem solving skills
- Good written and spoken English
- German will be an advantage

We offer:

- Interesting work with the latest technology
- Excellent working environment in a young and dynamic team
- Opportunity for personal and professional development
- Good remuneration
- Flexible work-time
- Consideration for long term employment when you complete the internship

Please send your CV in English along with information for some projects you worked on (could be from university or others) and a recent photo to: jobs.bulgaria@fio.de

All CV-s will be treated in strict confidentiality. Only shortlisted candidates will be contacted.
