Quality Assurance - Web

If you are looking for an interesting and challenging job and an excellent opportunity to become a team leader of a development team in short terms; if you would like to be part of a team of young and enthusiastic professionals who enjoy their job and have fun in a friendly and informal environment while working, we have a proposal for you.

We are Cayetano Gaming (www.cayetanogaming.com), a specialist in all forms of online betting and gaming. The software that we develop for clients is customized and based on the specific requirements of the application. Developing online gambling software is a multi-disciplinary process. It requires intelligent graphic design, complex mathematics, knowledge of player psychology, software engineering and a focus on security. Our experts in each field work closely together to deliver powerful wagering technology with strong player appeal.

If you would like to become a part of this fascinating world, just take a look below:

We are looking for Quality Assurance – Web
