

Quality Assurance Engineer

Komfo is the leading IT Company in Scandinavia that provides a subscription-based Social Media Management System. From the outset, Komfo has focused 100% on the commercial opportunities offered by Facebook's platform and, for that reason, was the first Scandinavian company to be accepted onto Facebook's Preferred Developer program at the beginning of 2010.

Our product has a very strong position in the Scandinavian market with more than 400 customers, including Electronic Arts, Microsoft and Samsung. Komfo was born with a global vision and is ready to serve international markets. The fast-growing offices in Denmark and Bulgaria currently employ more than 60 experienced and motivated professionals. For our expansion of the Sofia office we are looking for:

Quality Assurance Engineer

Technical requirements:

- Experience testing web applications;
- Experience writing automated tests;
- Experience with SQL;
- Experience testing RESTful web services will be an advantage;
- Experience testing social network applications will be an advantage.

What we expect from you:

- Take active part in the development and maintenance of our Social Media Management System;
- Research better and faster ways to test and contribute with your knowledge;
- Desire to develop and improve your ability to write automated tests;
- Constantly improve the testing infrastructure and procedures of our platform;
- Be a good team player.

What we offer:

- Work with modern technologies and methodologies in small agile teams;
- Innovative, friendly and supportive environment, which empowers you to make non-standard decisions;
- Excellent remuneration with flexible social benefits;
- Opportunities for career development.

The candidates approved for interview will be contacted within 2 weeks of application.
